04.01.06 Crawling Claws

A mob of severed hands, their mummified flesh black with soot, skitters out of the darkness across the dusty floor.

The crawling claws gang up on one party member. During the confusion, one of the claws tries to crawl into the character's backpack and hide there. It makes a Dexterity (Stealth) check contested by the character's passive Wisdom (Perception) score. If the claw loses the contest, the character sees the claw enter the backpack. If the claw wins the contest, it waits until the character takes a long rest before scuttling out to attack.

This pack adds some pretty fun missions, the most powerful gun in the game outside of the buzzsaw, and the sandman, the gun everyone used in FC3. As for the missions, they're all alot of fun. The writing is a bit bad. They went with a homophobic "is he gay is he not gay" thing with hurk, which from FC3 is totally out of character. it's like if you were to define "Bromance" to someone, and they completely missed the platonic part and just took "closeted homosexuality" out of it. The writing comes off as insulting to one of my favorite FC3 characters.

But that said, the writing isn't SO terrible, you can't enjoy the missions and the game. It's like ordering a bowl of delicious soup, and the bowl is textured to look like someone's shocked face. It's not blatantly disgusting, but you'd rather not have a face in awe stare back at you from your soup.

All in all, i'd give this DLC a 4/10. No reason to omit it from the game what so ever. Don't pay more than 2 bucks for it.. Simple 2D platformer with good, chunky pixelated graphics and varied enough gameplay and platforming so as to remain fresh. Not simply another "Limbo" / Silhouette knockoff, it leans more toward something resembling a medieval, creepy, Tim Burton / Alice-In-Wonderland esque setting. The gameplay is simple but you also have a double-jump, spells to throw, and a basic attack. Haven't played enough to know much whether there are bosses or not. Not many cutscenes at all. Straight forward and to the point but well-made.. its has a great improvement in art ,story, the interests of the game and character ,i love it. You play as Snek, you eat food as the Snek and get longer as the Snek.

Ten out of Ten, would Snek again!. Overall: 5/10

Music: 10/10

Story: 8/10

Gameplay: 2/10

Breakdown:

The gameplay is not good, mostly due to clunky controlls and getting caught on geometry in the environment not allowing for smooth gameplay. Level design is questionable at best, and appears to be slightly buggy (ie some walls that should be there are invisible until you solve the puzzle when it jerks the camera to look at the wall that was supposed to be there as it dissolves).

One of the most annoying issues in this game, especially since it's marketed as a rock opera game, is the fact that many noises (and a few dialogue lines) are much louder than the others. I think it those noises in particular are unaffected by the volume sliders, including the master volume slider. Overall, I'd say that it feels like it just needed more time in the oven to fix these issues.

The Story that I have seen, I believe that I just completed the first chapter, is solid. Nothing groundbreaking so far, but it's written decently. You affect the story very directly, which allows it to have a more meaningful impact.

The music is great. It's not perfect, but it is definately something I plan on listening to for the foreseeable future.

I will likely continue playing this game, but I've reached the end of my patience with the gameplay issues for now.. An absolute mess. This is exactly how not to make a game. The controls are difficult and cumbersome, sometimes my gun just dropped without me pressing anything or just doesnt shoot at all. I did not always start the level with the gun i chose in the weapon selection level. my gun also did not always reload. movement is too slow and bumping into building is a collision nightmare. please add automatic reloading, faster moving and better collision system.. Perhaps the worst computer game I've ever played... and I'm going back to the days of Atari here. Don't buy this game unless you're looking to be amazed that any company would

dare charge \$40 for something in 2013 that's on the te♥♥♥♥♥al level of something made in the early 90s or earlier. I won't go so far as to say it's a scam, but I do wonder.. This is a very good naval wargame with very poor training. If you still remember how to use a boring text manual, go ahead!. This game is so fun for local multiplayer! It's like a crazy retro-styled air hockey!. This is cool. It's definitely worth it on sale. It's basically The Lab's remote control flying vehicle in obstacle courses.

rotate automatically to enemies even if they are not in the focus. You can't just rotate your unit. If you want to rotate your unit, you need to make it move to that direction. There is some concept of rotating to marginally different way when setting waypoint, but it's unusable.

- Scavenging. 90% of storages are empty or filled with junk. Only thing you can scavenge and is useful are guns. Also game is stupid and if you have more than one unit selected and scavenge, it selects same unit everytime, even though he is full, so you need to select manually different unit. Scavenging is just repetitive, useless and boring in this game.
- No strategy. Most you can do is set different position of units. This basically makes this a tower defense like game.

If you are like me and are type of person who likes xcom or doorkickers, you are probably not going to like this game. If however, you like tower defense games, you might.. Man... I'm sorry to say this... but this was really sad, one of the worst things I have tried on the Vive... don't even waste your time. Voice acting was... well, terrible, story was the same. Sad.
